- Collaborated with multidisciplinary teams to support the production of Nigeria's National Health Accounts.

Duties & Achievements

- Planned and delivered Biology and Basic Science lessons in line with the school curriculum.
- Assessed students' academic progress and provided guidance to improve learning outcomes.
- Prepared lesson plans, instructional materials, and classroom assessments.
- Fostered an engaging learning environment that encouraged student participation and critical thinking.

TECHNICAL SKILLS

-
- **Data Analysis:** Microsoft Excel (Advanced), Power BI, Python, R
 - **Data Visualization:** Dashboards, Charts, Power BI, Plotly, ggplot2
 - **Data Management:** Data Cleaning, Data Validation, Data Quality Assurance
 - **Health Information Systems:** Electronic Health Records (EHR), Claims Management, Health Information Management
 - **Healthcare Analytics:** Healthcare Research, Health Data Analysis, National Health Accounts (NHA), Health Accounts Production Tool (HAPT)
 - **Reporting & Documentation:** Quarto, Dashboard Development, Data Reporting, Data Mapping
 - **Productivity Tools:** Microsoft Office Suite (Excel, Word, PowerPoint)

EDUCATION

Amadu Bello University, Zaria, Nigeria Master of Public Health (MPH), Epidemiology	2024 to 2026
University Of Port Harcourt, Choba, Nigeria Bachelor of Science (B.Sc.) in Human Physiology	2015 to 2019

CERTIFICATION AND CONTINUING EDUCATION

Microsoft power bi for business intelligence and visualization- Strategic Insights and Analytics (SI Analytics) (2025)
python for data analysis and visualization- Strategic Insights and Analytics (SI Analytics) (2026)
Learn Data Analysis with Excel and SPSS- Qualihealth (2023)

PROJECTS

Physical Activity Analysis Dashboard | Python, Plotly, Quarto

- Analyzed physical activity data to identify trends across age groups, gender, BMI, and WHO physical activity recommendations
- Developed an interactive dashboard using Python, Plotly, and Quarto to visualize activity patterns and support data driven insights.

Government & Out-of-Pocket Health Spending Analysis | R, ggplot2, power bi

- Cleaned, transformed, and analyzed government and out-of-pocket health expenditure data using R.
- Developed an interactive Power BI dashboard and comparative visualizations with ggplot2 to identify health spending patterns across selected African countries.

NFL Injuries Trend Dashboard | Python, Plotly, Quarto

- Cleaned and analyzed 10 years of NFL injury data to uncover trends in player injury status and annual injury patterns.
- Designed an interactive dashboard with KPI cards, trend visualizations, and technical analysis pages using Python, Plotly, and Quarto.
